## **WE SERVE MORE THAN** A MILLION IOWANS: YET, BLUE CROSS AND BLUE SHIELD KNOW THAT JOEY BROKE HIS LEG.

in these days of computers, Joey's case may have had a number a foot long.

It has to be that way with us. How else could we keep up with tens of thousands of claims a month, payments of 134 million dollars a year, and service to more than a million lowans?

But, while we deal with cold figures in taking care of Joey's case, we still think of him in warm, human terms. Because, basically, Blue Cross and Blue Shield are people helping people, and machines only help us do a better job of it.

For one thing, machines help us process cases with speed and accuracy.

For another, they provide us with studies that show what the care in each case should cost. Thirty years of experience with a lot of broken. legs gives us a pretty accurate idea of what Joey needed.

And this is the kind of studying that helps us work out strong cost-controlling programs to help keep your rates down.

As a major lowa business, we have to operate in a business-like way. Soundly, efficiently, But we're far more than a business. Thank goodness for that because if we were only a business, we'd be a terrible flop. You see, we don't make a cent of profit, and we like it that way. So will you,
